DETAILED ACTION

Claims 19-26 and 28-29 are pending and are under consideration.

Election/Restrictions

Applicant's election of Group I, claims 19-26 and 28-29, in Paper No. 11, filed 11-1-02, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

It is noted that Applicant has cancelled the single non-elected claim.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). Specifically a reference to Application Number 09/240,639, now US Patent 6350447, is required.

Sequence compliance

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 C.F.R. 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 C.F.R. 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Sequences, which lack SEQ ID NO: tags, are disclosed throughout the specification including in page 95, lines 28-29, page 98, line 26, page 100, lines 27, 28, 30 and 33, page 101, lines 1, 18, 19 and 25, and page 103, lines 7-8. Applicants are required to resubmit a substitute disk and paper copy of the sequences according to the attached "Notice to Comply with the Sequence Rules." Applicant is reminded of the sequence rules which require a submission for all sequences of more than 9 nucleotides or 3 amino acids (see 37 C.F.R. 1.821-1.825) and is also

Art Unit: 1644

requested to carefully review the submitted specification for any and all sequences which require compliance with the rules.

Specification

The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlinks and/or other form of browser-executable code. See MPEP § 608.01. Specifically, hyperlinks are disclosed on page 99, lines 19 and 28-29, and on page 100, lines 19-20 and 22. Applicant is requested to carefully review the submitted specification for any and all embedded hyperlinks and/or other form of browser-executable code.

The abstract of the disclosure is objected to because the word “novel” is stated in line 1 of the Abstract. Patents are presumed to be novel. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19-26 and 28-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are indefinite in their recitation of the word “fragment” because it is not clear if said fragment is an antigen binding fragment. Inserting the term “antigen binding” before the word “fragment” would overcome these rejections.

No Claim is allowed.
